Message:

Commissioners:

The Alachua County Commission referred the attached outline for an infrastructure surtax referendum to our staff. They'll report back to us in 60 days regarding details for each of the elements, and including one additional idea to look at water quality projects such as wastewater connections for septic tank users. I would welcome the opportunity to talk with each of you about the assumptions and details built into this proposal. For this to succeed, it has to be something every elected official gets behind -- so I hope you'll do whatever is necessary to make this yours'.

Cheers,

Hutch
